About us

Telyton World is a decentralized, crypto-based system that has been empowering investors and traders since 2020. Built on blockchain technology, Telyton World offers a secure, transparent, and future-ready platform designed to harness the full potential of decentralized finance (DeFi).

We specialize in crypto and forex trading, delivering consistent and handsome returns on investment for our growing global community. By combining advanced trading strategies with the power of decentralization, we provide our users with diversified income opportunities across both the cryptocurrency and traditional forex markets.

Our mission is to simplify wealth-building through smart, secure, and scalable financial solutions. Whether you're a seasoned investor or just beginning your journey into digital finance, Telyton World is here to help you take control of your financial future.

Join us and be a part of a thriving ecosystem where innovation meets opportunity.

Vision & Mission

Vision Our Vision is to become the foremost choice for global importers seeking premium-quality Indian produce, establishing long-term partnerships built on reliability, transparency, and unparalleled customer satisfaction.

Mission Our Mission Driven by a passion for delivering fresh, high-quality produce, our mission is to consistently provide a wide array of organically cultivated vegetables and fruits, ensuring that our clients across the globe experience the authentic flavors and nourishment that nature offers.

TELYTON VALUES

INTEGRITY

We uphold the highest ethical standards in all our interactions and transactions.

SECURITY

We prioritize the safety of our users' assets and personal information through robust security measures.

INNOVATION

We constantly explore new technologies and ideas to enhance our platform and services.

EDUCATION

We are committed to providing accessible educational resources to empower our users with knowledge about cryptocurrency trading.

WHY CHOOSE TELYTON WORLD?

PROVEN EXPERTISE :

With over a decade of experience in the financial industry, we have a track record of delivering consistent results and building sustainable wealth for our clients.

INNOVATION-DRIVEN :

We leverage cutting-edge technology and industry-leading strategies to provide solutions that are as dynamic as today's economic landscape.

TRUST AND TRANSPARENCY :

We build relationships based on integrity and open communication, giving you the confidence to achieve your financial goals with us by your side

GLOBAL REACH :

Operating in 15 countries, we bring international expertise and local insights to help you succeed in diverse financial markets.

CRYPTOCURRENCY TRADING

Digital Asset Market

Crypto currency trading involves the buying, selling, and exchanging of digital assets, known as crypto currencies, on various online platforms.

Volatility and High Risk-Reward

Crypto currencies are known for their extreme price volatility. While this volatility can lead to substantial profit opportunities in a short time, it also poses significant risk.

Diverse Trading Strategies

Crypto currency trading encompasses a range of strategies, including day trading, swing trading, and long-term investing. Day traders capitalize on short-term price movements, while swing traders hold positions for a few days or weeks.

DECENTRALIZATION ?

What does "Decentralized" mean? What are the advantages and what are the benefits? Decentralized marketing is created with an automated contract that offers you maximum security and sustainability. A smart contract is an automatic execution algorithm. It exists within the Tron block chain, one of the TOP cryptographic currency.

SMART CONTRACT ?

Smart contracts, like cryptocurrencies, are decentralized. They work strictly according to the underlying program, without the possibility of subsequently Changing the defined execution. The code that contains all the logic of the contract expiration is on the block chain and all calculations are provided by millions of computers around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project. The block chain is an immutable record of transactions and information, which is cryptographically protected from any subsequent manipulation using thousands of independent computers worldwide

AI TRADING SOLUTION

TELYTON boasts a team of seasoned AI experts and traders who have developed advanced algorithms and predictive models. Through sophisticated machine learning techniques, our AI-powered trading platform enables users to make informed investment decisions, capitalize on market trends and optimize their trading strategies. By leveraging the power of AI, TELYTON aims to level the playing and profitable for both beginners and experienced traders.

WHAT IS SMART CONTRACT

Smart contracts, like cryptocurrencies, are decentralized. They work strictly according to the underlying program, without the possibility of subsequently changing the defined execution. The code that contains all the logic of the contract expiration is on the blockchain and all calculations are provided by the millions of computers around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project. The blockchain is an immutable record of transactions and information, which is cryptographically protected from any subsequent manipulation using thousands of independent computers worldwide

WHAT IS CRYPTO CURRENCY

Cryptocurrency is a digital or virtual form of money that uses cryptography for security. It operates on decentralized networks based on blockchain technology—a distributed ledger enforced by a network of computers (nodes). Unlike traditional currencies issued by governments, cryptocurrencies are not controlled by any central authority. Popular examples include Bitcoin, Ethereum, and Litecoin. Transactions are secure, transparent, and often anonymous. Cryptocurrencies can be used for various purposes, such as online purchases, investment, and decentralized applications. They offer faster, borderless payments but come with risks like volatility, regulation issues, and security threats. Their value is determined by supply, demand, and market speculation.

The Future of Cryptocurrency

The future of cryptocurrency appears dynamic and transformative. As blockchain technology matures, cryptocurrencies are likely to gain broader acceptance in global finance, with increased use in payments, remittances, and decentralized finance (DeFi). Central Bank Digital Currencies (CBDCs) may coexist with decentralized coins, offering stability and regulatory oversight. Improved regulation, scalability, and security will help legitimize the market, attracting institutional investors. However, challenges like environmental impact, market volatility, and cyber threats persist. Overall, the crypto space is expected to evolve rapidly, playing a significant role in reshaping how people exchange value and interact with financial systems.

WHAT IS TRADING?

Trading is the buying and selling of financial instruments in order to make a profit. These instruments range from a variety of assets that Trading is the buying and selling of financial instruments in order to make a profit. These instruments range from a variety of assets that are assigned a financial value that can go up or down – and you can trade on the direction they'll take. are assigned a financial value that can go up or down – and you can trade on the direction they'll take.

You may have heard about stocks, shares and funds. But there are thousands of financial markets you can trade, and a variety of products you can use to trade them.

ALL TRANSACTIONS ARE PROTECTED

Start accepting crypto payments in Wallet

Track your orders statistics and easily withdraw your funds to Wallet.

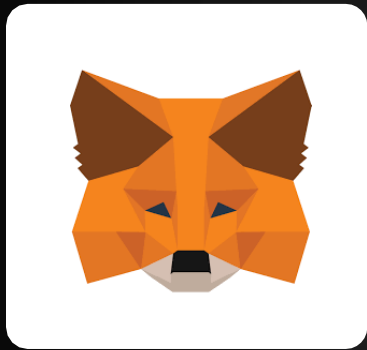

All Transactions Are Protected

All transactions are protected by advanced cryptography and cannot be altered or hacked by third parties. Also, you can analyze all transactions with TELYTON guard – the first cloud-based solution for TELYTON, which provides AI driven tools for advanced monitoring.

Telycoin (TC) Features

Decentralized Wallet:

Telyton (TC) Exchange's decentralized wallet ensures that users have full control over their private keys, eliminating the risks associated with centralized custodians. This feature empowers users to securely store their digital assets without relying on third parties, enhancing security and trust.

Diverse Cryptocurrency Support:

The platform supports trading a wide range of cryptocurrencies, including major assets like Bitcoin (BTC) and Ethereum (ETH), along with numerous altcoins. This diversity allows traders to explore various investment opportunities and diversify their portfolios effectively.

Peer-to-Peer (P2P) Trading:

With P2P trading, users can directly trade cryptocurrencies with one another, bypassing intermediaries. This feature offers lower transaction fees, greater privacy, and flexibility in payment methods, making it particularly valuable in regions with limited access to traditional banking.

Telyton (TC) Card:

The Telyton (TC) Card bridges the gap between cryptocurrencies and everyday transactions by allowing users to convert their crypto holdings into fiat currency instantly. This card, compatible with Visa and MasterCard networks, enables seamless online and in-store purchases globally, making crypto spending effortless.

Crypto ATM Integration:

Telyton (TC) Exchange integrates with a growing network of crypto ATMs, enabling users to convert their digital assets into cash or vice versa with ease. This feature increases accessibility for users, especially in areas with limited digital payment infrastructure, and makes crypto transactions more practical and tangible.

Advanced Trading Tools

For traders looking to gain more control and explore advanced strategies, Telyton (TC) Exchange offers a variety of powerful tools. These tools help traders refine their approach, make informed decisions, and navigate complex market conditions with ease.

Spot Trading

Buy or sell at current market prices, ideal for both beginners and experienced traders.

Margin Trading

Amplify positions by borrowing funds, offering the potential for higher gains-and greater risks.

Futures Contracts

Trade on the predicted future value of cryptocurrencies, adding a sophisticated layer to your trading strategy

Advanced Charting Tools

Access detailed charts with key indicators such as Moving Averages and RSI (Relative Strength. Index) to make informed decisions.

Custom Alerts

Stay updated in real-time with tailored alerts, ensuring you never miss important market movements.
